Difficulty: Medium Hard

Description

An ***anagram*** is a word or phrase formed by rearranging the letters of a different word or phrase, typically using all the original letters exactly once. For example, the word anagram itself can be rearranged into the phrase...

The mission is to find a way given two strings. The first string contains a sentence containing the letters of the second string in a consecutive sequence but in a different order. The hidden anagram must contain all the letters, including duplicates, from the second string in any order and must not contain any other alphabetic characters.

You need to find the anagram of the second string embedded somewhere in the first string. and you should ignore the character case, any spaces, and punctuation marks and return the anagram as a lower case string with no spaces or punctuation marks.

Inputs

Two strings line by line. The first string contains a sentence containing the letters of the second string in a consecutive sequence but in a different order. The hidden anagram must contain all the letters,

Outputs

Return the anagram found as a lower case string with no spaces or punctuation marks.

Constraints

- A perfect anagram contains all the letters of the original, in any order, no more, no less.
- If there is no hidden anagram in the sentence, return "Not Found".
- The hidden anagram may start or finish part way through a word and/or span multiple words and may contain punctuation marks and other non-alpha characters.
- Ignore character case and any embedded non-alpha characters
- If there is more than 1 result in a sentence, return the nearest to the beginning.

Examples

Input	Output
A diet? No time! Meditation <i>// The sequence "A diet? No tim" is an anagram of "Mediation"</i>	adietnotim
The eyes. They never lie chico! theeyes <i>// The sequence "The eyes" is an anagram of "theeyes" clearly</i>	theeyes

An old west action hero actor Clint Eastwood <i>// The sequence "n old west actio" is an anagram of "Clint Eastwood".</i>	noldwestactio
